Xiamen NanoTech Achieves ISO 9001: 2008 Certification

Singapore, August 10th, 2012 – NanoMaterials Technology Private Limited (“NMT”) had successfully acquired ISO 9001:2008 certification for its wholly-owned subsidiary in China, Xiamen NanoTech Company Limited (“XNT”). The certification is issued by CQM Certification, one of the most recognized ISO9001 certification bodies in China. XNT has also received certification from IQNET, a worldwide recognized association representing 37 national and international certification companies which provides management systems certifications, effective from 19 July 2012. The ISO 9001 certification validates that a qualified quality management system is in place at XNT and demonstrates NMT’s abiding commitment to quality and regulatory requirements, customer satisfaction, and continuous improvement.

NMT-XNT is a leading nanotechnology company, where it utilizes its proprietary High Gravity Controlled Precipitation (HGCP) and dispersion technology to produce various nano-materials. NMT-XNT’s latest nano-product range is Nano-D Series – a series of nano-sized metal oxide dispersion in a wide range of dispersing media are highly transparent and have excellent disperse-ability even at very high solid loading which gives unique properties such as UV light absorbing, IR light reflecting, anti-abrasion, photo-catalytic, oxygen-storing, abrasive etc. The Nano-D Series have generated interests and enquiry pertaining to their performance enhancement to various applications such as automotive & wood coatings, solar control film/coating, petrochemicals, CMP, plastics & polymer and medical etc. Companies from the pharmaceutical and specialty chemicals sectors were constantly interested in seeking NMT-XNT’s proprietary HGCP Technology to

explore the benefits of nano-sizing their products, which NMT-XNT is able to support via contract research collaboration.

The certification, which involves an arduous, multi-phase certification audit, is based on the ISO 9001:2008, the International Standard for Quality Management Systems (QMS). It provides XNT with a set of principles that ensure a common sense approach to the management of business activities to consistently achieve customer satisfaction. The standards are set by the International Standards Organization and the certification meant that NMT had achieved the highest global standards for the design, development, and management of XNT the company, as well as its products and services.
